

Classroom Legionella Training

"Inadequate management, lack of training and poor communication have all been identified as contributory factors in outbreaks of legionnaires disease"-Approved Code of Practice (ACoP) L8."

Accredited by the Chartered Institution of Building Services Engineers (CIBSE) for continual professional development, this popular one day classroom based legionella training package is aimed at persons with some form of managerial responsibility for the control of legionella on their sites, operators who would like more in depth legionella training, or personnel new to the industry.

ACoP L8 states that any person involved with carrying out control measures and strategies should be "suitably informed, instructed and trained and their suitability assessed". Starting at 09:00 a.m. the course

finishes at 3:30 p.m. (or 5.00 p.m. with the optional evaporative cooling water systems module)

Courses are held around the UK, and regularly held at our offices near Bicester, details of which can be found on our website. If there are sufficient numbers, it may be more cost effective to conduct the course at your site as opposed to coming to one of our venues.

The course comes in 6 modules after which there is a questionnaire ensuring that those taking the course have their competence assessed.

The legionella training courses consists of:

- Background to the bacteria and disease
- Where legionella is found
- United Kingdom Legislation
- Risk assessment, control and management
- Hot and cold water systems
- Evaporative cooling water systems

Customer Comments

"Very well delivered and informative course, very interesting and useful, many thanks".

"Great content throughout the training course, very informative"

"For us the training was exactly what we needed and was very well delivered"

"A very able instructor whose easy going manner and ability to make what could have been rather dull a quite enjoyable course."

"I consider the training that my staff undertook was cost effective and very successful and I certainly will be looking to use your Training services again..."
