

Legionella Training CD-ROM

Ensuring that relevant personnel included at any level with managing the risk from Legionella bacteria on a site are effectively trained and competent is a fundamental requirement in the Approved Code of Practice L8.

The ACoP L8 particularly stresses that regular refresher training should be carried out and recorded for all personnel. Licensed to a site and costing £199.00, our Computer Based Training (CBT) legionella training

CD-ROM is aimed at these clients with operators requiring training. It also provides refresher training for those with managerial responsibility allowing cost effective training for a multitude of personnel.

The legionella training CD-ROM covers all aspects of the control of legionellosis.

This self-study tutorial comes in four parts:

- Legionella awareness
- Management of hot and cold water services
- Cooling water treatment
- L8 – update & review of the new ACoP
